DETAILED ACTION
REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The closest art of record are:

- a. Bjornson et al (US 2002/0092767), which teaches that is known to the art to make analytical tools, like disclosed by applicant using a substrate of polymethyl methacrylate (PMMA) which has been treated to make it sufficiently hydrophilic in order to draw in liquid samples by capillary action [0033]. However, Bjornson et al does not teach applicant's two step process in order to make the PMMA hydrophilic.
- b. Kuckertz et al (US 6419995), which teaches methods for making polymeric surfaces (including PMMA, col 5, line 12) hydrophilic by using a gas treatment process. This gas treatment process can include a single step of treating the surface with a combination of gases in a Markush group. These gases include fluorine gases, oxygen and water (col 5, lines 55-67), but there is no indication that applicant's claimed reaction steps would take place using these chemicals, nor is there a motivation to do a first and second gas reaction step, one step appears to be sufficient.
- c. Murashige (JP 60088044), which teaches making PMMA hydrophilic by exposing it to a mixture of fluorine gas and an oxygen bearing gas (sulfur dioxide) in order to make a capillary tube (English abstract). However, as described by Murashige, the reaction caused by this gas treatment does

not bond to the keto group of the PMMA, but rather substitute for a hydrogen group off the carbon backbone (formula 1, page 296), so it does not appear to read upon applicant's claimed reaction. Furthermore, there is no indication of a subsequent treatment step for bonding the substituted group with a hydroxyl group is present or needed, since the hydrogen freed by the original substitution forms a hydroxyl group form by itself.

Thus the art of record does not fairly teach or suggest making the PMMA surface of an analytical tool hydrophilic by performing applicant's specific two step modification process of the keto group of PMMA.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
